Sustainable Outdoor Lighting
Solar. Hybrid. Grid.

Welcome to the future of environmentally friendly outdoor lighting!
Welcome to **hei**!

Climate change, nuclear risks and overexploitation of natural resources require an ambitious and swift transition towards sustainability including solar powered, carbon-free technologies world-wide.

The mission of **hei** is to contribute to global sustainable development by designing and manufacturing outdoor lighting with paramount efficiency for minimum environmental impact.

This is supported by our strict designing criteria:
environmental-friendly materials, utmost efficiency, and use of solar power, wherever available.

We also supply outstanding aesthetical design, because we think green products should please not only the environment but our eyes, too.

Finally, the advantageous commercial "side effect" of energy efficiency and solar power is low operating and initial costs.

All in all, climate protection by sustainable outdoor lighting is a win-win situation for all of us environmentally, aesthetically and economically.

Welcome to **hei**! The future of lighting. Today.

Solar powered.
Environmental-friendly.

Less maintenance.
No sand, snow or dust accumulation.
No soiling.

Smart lighting control.
Self-learning.
Reliable.

No cabling.
No electricity grid required.

Contemporary aesthetics.
Forward-looking design.

Remote lighting control.

No trenching.

Highly efficient LED technology.

No PV panel.
Slim design.
Low wind load.

Minimal installation costs.
No electricity costs.

Superb light distribution.
Increased pole distance.

No electricity consumption.
No CO₂ emissions.
No nuclear risks.

Power Tube.
Omnidirectional
sunlight collection.

Simple installation.
Plug & play.

SMART POLE
APPLICATIONS

Would you like more than just environmentally friendly street lights? You are very welcome! Various equipments can be integrated to transform a humble light pole into a multifunctional, solar powered, smart city furniture. A solar powered weather station? No problem! A solar powered Wi-Fi hotspot? Sure! Traffic signs, cameras, loudspeakers, communication and sensor modules, etc. can be added and powered by the sun.

products 2020” brochure.

auriga
SOLAR LIGHT TUBE

Unleash the lighting from
the cable.

All the essential parts of a
solar light (batteries, elec-
tronics, LED engine, PV
module ...) were rede-
signed and innovatively
combined into a single unit.

Compatibility with the
majority of standard pole
geometries, diameters and
heights ensures that hei
auriga can tackle virtually
any lighting requirements,
perfectly illuminating every-
thing from walkways to
highways.

auriga step
P200-215

Liberating the energy supply from the cable.

hei libertas add-on solar power tubes contain everything needed to reliably harvest solar energy and supply it later to provide illumination. Regardless of geometry, height or diameter **hei libertas** fits most standard poles - either in new or existing installations.

For perfect illumination, choose from a variety of highly-efficient **hei** luminaires, all without having to replace poles – just cut the cables and forget them!

LIBERATING ENERGY SUPPLY FROM THE CABLE

Paramount efficacy and maximum energy saving.

The right choice for environmental-friendly street lighting, minimum energy demand, maximum cost saving and excellent light distribution.

All luminaires provide an efficacy of 160 lm/W or more and are available for AC, DC and solar power supply.

various wattages

AC grid antares 4000

Decorative, self-sustaining and maintenance-free.

Solar light poles for outdoor lighting applications such as residential streets, bicycle tracks or parking sites. Award-winning, protected design. Full solar power supply, no grid-connection required.
